## WINTER SESSION, 1874.

*Meetings will be held on the following Monday Evenings:—*

MAY 4.  
JUNE 1.  
JUNE 29.

JULY 27.  
AUGUST 24.  
SEPTEMBER 21.

OCTOBER 26.

*To commence at 7.30 p.m.*

---

### *Extract from the Rules.*

1. Any person desiring to become a member of the Institute, shall be proposed in writing by two members, and shall be balloted for at the next meeting of the Council.
3. New members on election to pay one pound one shilling entrance fee, in addition to the usual subscription of one pound one shilling, the annual subscriptions being payable in advance on the first day of April for the then current year.
4. Members may at any time become Life-members by one payment of ten pounds ten shillings, in lieu of future annual suscriptions.

## REPORT.

---

THE Council of the Auckland Institute, in presenting their Report for the past year, have pleasure in stating that the general interest evinced in the progress of the Institute has undergone no abatement, while the number of new members is greater than in any previous year; and although the serious disadvantage under which the Institute labours from the want of suitable buildings has not been removed, yet in other respects the Council are able to give a favourable account of the interests committed to their charge.

During the year six meetings have been held, at which the following papers were read, most of which will be printed in the next volume of the "Transactions of the New Zealand Institute":—

1. Introductory Address :—by the PRESIDENT.
2. On the Geological Structure of the Thames Gold-field :—by Capt. F. W. Hutton, F.G.S., C.M.Z.S.
3. Analysis of the Thames Water Supply—from the Colonial Laboratory :—communicated by the PRESIDENT.
4. On the New Zealand Species of Cheilanthes :—by T. KIRK, F.L.S.
5. On Bastian's recent work on Spontaneous Generation :—by T. HEALE.
6. On Cosmography :—by J. LEITH.
7. On the Reclamation of Sand Wastes :—J. STEWART, C.E.

8. On Induction and Necessary Truth :—by the Rev. R. KIDD, L.L.D.

9. On an Economical method of Felting Steam Boilers :—by J. C. FIRTH.

10. Notes on the Reclamation of Sand Wastes :—by T. KIRK, F.L.S.

11. Report on a series of Rock Specimens from the Tokatea Tunnel :—by Dr. HECTOR, F.R.S.

12. On the probability of a Water Supply being obtained from Mount Eden :—by J. GOODALL, C.E.

13. On the Easy Prediction of Occultations and Eclipses :—by T. HEALE.

14. Further Notes on the probability of obtaining a Water Supply from Mount Eden :—by J. GOODALL, C.E.

15. Notes on the same :—by J. STEWART, C.E.

16. Description of a new species of Cordyline :—by T. KIRK, F.L.S.

17. Notes on Indigenous materials suitable for the manufacture of Paper :—by T. KIRK, F.L.S.

The Museum and Library have been well frequented by the public, and the donations have been numerous and valuable, as may be seen from the appended list. Special thanks are due to Mr. T. Kirk, F.L.S., for a series of Wood Sections, New Zealand Shells, a collection of British Ferns, and other valuable additions.

The Council regret that on account of the inadequate amount of space at their disposal, it has not been possible to make better arrangements for exhibiting the various objects for the purposes of study and reference. The collection of Type Minerals continues to attract a large number of visitors, as does the collection of Native Birds.

It is intended to mount and re-arrange in a more convenient manner the copious collection of New Zealand Shells now in the Museum.

The scientific value of the annual volume of "Transactions" is so generally admitted, that little reference need be made to it here. The fifth volume has been duly received, and supplied free of cost to the members. The sixth volume is now in the press, and will probably be issued in the course of a few months.

At the end of the year, Mr. T. Kirk, F.L.S., Secretary and Treasurer to the Society, resigned his office, in consequence of having accepted an appointment as Lecturer on Natural Science to the Wellington College. The Council would here place on record their appreciation of the services rendered by him to the Institute during the last six years. But for his unwearied exertions and constant attention to the affairs of the Society, it could not have attained its present amount of success. The Council feel that his removal will be a serious loss, not only to the Institute, but also to the Province.

The want of suitable buildings for the Museum and Library, referred to in the Reports of previous years, is the great drawback to the progress of the Institute, and the one which must be removed before any substantial advance can be made. Considering the importance attached in all civilized countries to Public Museums and Libraries, not only as sources of rational enjoyment, but as educational institutions, promoting a love for science, the Council earnestly hope that means may, ere long, be devised for providing the accommodation so urgently required; and that the Institute will continue to receive that liberal support from the Public which is due to an Institution whose chief aim is to secure the advancement of knowledge, and the diffusion of scientific and practical information throughout the community.

THE TREASURER IN ACCOUNT WITH THE AUCKLAND INSTITUTE.

MAY 17TH, 1873, TO JANUARY 13, 1874.
